PROJECT NAME: Vehicle Sale & Purchase System

Write your Project Scope. (Better to write it in a paragraph form instead of bullet points, And paragraph should have around 10-12 lines)

We are automating vehicle bazaar, by providing features for buyers and sellers in one place. Dealers can add their vehicle details. All required features are also previewed there. The buyer can search any of the vehicles according to his/her required features. Buyers can view dealer feedback and reputation as added by previous buyers. We also add a blog where persons can discuss and share their views about vehicles. Further, there is a facility to buy vehicles in this software. Buyers can book their order by contacting the owner. The cost of the vehicle can be paid by debit card. In addition, if a person wants to pay cash on delivery, this facility is also available. It will be available for 24 hours.

State Requirements of your project. (Functional Requirements, User Requirements, Non-Functional Requirements).

User Requirement:

Dealer:

UR-01: As a Dealer, I shall be able to add the detail of my vehicle.

Buyer:

UR-02: As a Buyer, I shall be able to search the vehicle.
